preferred method send check payable to: "LACSD-AAEE event" attn: Sylvia Williams 1955 Workman Mill Road Whittier, CA 90601  
Or via email [swilliams@lacsd.org](mailto:swilliams@lacsd.org)

We hear the word "**Sustainability**" used so frequently that its meaning is blurred. In the Environmental Engineering profession, sustainability concepts have been around for decades but are becoming increasingly important as we are asked to consider global water and climate impacts and life-cycle project performance. **Dr. Tim Haug** will share his thoughts on "**Sustainability-What is It and Do We Mean It**" from his perspective as a large utility manager/practitioner and professor. **Rich Atwater** manages an Agency known for its innovation in energy conservation/production, water reuse, biosolids management, and green building design, all of which are outstanding examples of sustainable wastewater operations. The American Academy of Environmental Engineers (AAEE) is developing a new certification in **Sustainability Engineering**, which will provide an opportunity for recognition of expertise in this expanding area in the Environmental Engineering profession. Come and learn from industry leaders about this timely topic and AAEE's initiatives.

**Location:**

1 LMU Dr #1000  
Los Angeles, CA  
90045-2677 Directions are available at [www.lmu.edu/resources/Campus\\_Maps.htm](http://www.lmu.edu/resources/Campus_Maps.htm)

The Ahmanson Auditorium is located in LMU's University Hall approximately 4 miles north of LAX off Lincoln Blvd. University Hall is marked, it's the very large building immediately adjacent to the Lincoln Blvd. entrance. Please park for the event on levels L2 or L3. Meet in the Macintosh Center on the 3<sup>rd</sup> Floor for dinner and then proceed downstairs.
